### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: The primary reason for allowance of claims 1-7 is the inclusion of the limitations of a print head that includes an electrode having a pad provided on the wiring pattern and an upper layer formed on the pad, the upper layer having a higher solderability than the pad while having a smaller area than the pad. It is this limitation found in claims, as it is claimed in the combination of that has not been found, taught or suggested by the prior art of record, which makes these claims allowable over the prior art.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Susukida et al. (US 6,614,460 B2) disclose a thermal head having a protection layer, reinforcing member made of a low melting point. Takeya et al. (US 2005/0219349 A1) disclose a thermal head having a resilient adhesive capable of absorbing thermal strain. Hayashi et al. (US 6,469,724 B1) disclose individual electrodes having an end portion formed with a bonding pad. Obata et al. (US 6,424,367 B1) disclose an thermal printhead having individual electrodes having a tip portion having a smaller width and an intermediate portion having a larger width.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
